

```
1 #lang racket
2 ; (eval (quote (+ 1 2 3))) ;
2 only works in the REPL!
3
4 (apply + (list 1 2 3))
5
6 ;; Apply can take other
6 arguments as well (last
6 argument must be a list)
7
8 (apply + 1 2 (list 3))
9
10 ;(apply + (list 1) 2 3)
11
12 (apply print (list (print 1)))
13
```
